Summary

Motivated and detail-oriented B.Tech CSE (AI and ML) student with hands-on experience in Machine Learning, Deep Learning, and Predictive Modeling. Proficient in Python, TensorFlow, Scikit-learn, and data visualization. Passionate about solving real-world problems through data-driven systems. Skilled in collaborative workflows, Git, and Agile methodology.

Skills

Languages: Python, SQL

Machine Learning & AI: Machine Learning, Deep Learning, NLP, Computer Vision, Prompt Engineering, Generative AI

LLM & RAG: Large Language Models(LLMs), Retrieval-Augmented Generation(RAG), Vector Embeddings, LLM Application Development

Vector Databases & AI Tools: Pinecone, n8n, Vector Databases, AI workflow Automation

Libraries & Frameworks: Pandas, NumPy, Scikit-learn, TensorFlow, Keras, PyTorch, Seaborn, Matplotlib, openCV, FastAPI

Tools & Platforms: Streamlit, Streamlit Cloud, Google Colab, Jupyter Notebook, VS Code, PyCharm, Git, Github

Other Skills: Data Visualization, Data Analysis, Statistics, Hyperparameter Tuning, Model Evaluation

Work Experience

VcodeZ, chennai Jan 2025 - Apr 2025

Machine Learning Intern

- Contributed to real-time ML projects using Python and Scikit-learn, including a Stock Price Prediction model with Random Forest and technical indicators.
- Developed a Mushroom Edibility Classification system with data visualizations, performing preprocessing, feature engineering, and model evaluation.
- Worked collaboratively using Git and Agile methodologies, ensuring efficient version control and timely project delivery.

Artificial Intelligence Intern — Verzeo (Remote) Nov 2022 - Dec 2022

- Built An Image Classification model using Python, NumPy, Pandas, and Scikit-learn.
- Improved model accuracy by 15–20% through EDA and hyperparameter tuning.
- Documented results and presented key findings to mentors.

Education

Vels University - Chennai Aug 2022 - May 2026

B.Tech in Computer Science and Engineering (Artificial Intelligence and Machine Learning) ***CGPA: 8.18/10***

Relevant Coursework: Object Oriented Programming, Databases, Maths and Statistics, Data Structures and Algorithms, Operating Systems, Computer Networks, Machine Learning, Deep Learning, Natural Language Processing, Data Mining and Visualization

Project Work

- **Automated Trading Bot with Real-Time Stock Analysis -** Developed an automated trading bot using Python and Flask that analyzes live market data with indicators like SMA, EMA, RSI, and MACD. Integrated a Random Forest model that improved prediction performance by 20%, and deployed an interactive dashboard with a rule-based chatbot to streamline trade monitoring and decision transparency.
- **MultiModal AI Assistant -** Developed a privacy-focused AI assistant with voice (Vosk) and gesture controls (MediaPipe). Built a hybrid intent system using rule-based logic and a scikit-learn model achieving 96.5% accuracy. Implemented a modular skill architecture and a transparent Tkinter HUD for real-time feedback.

Certificates

- **Machine Learning with python** — IBM Skills / CognitiveClass.ai
- **Prompt Engineering For Everyone** — IBM Skills / CognitiveClass.ai
- **Deep Learning Essentials** — IBM / credly
